

PIDICRON WHITE MPTE

- Pidicron White MPTE is a ready khadi paste developed specially for printing all types of fibers and their blends.
- It is supplied as a smooth white paste with fine particle size for ease in application and has good all round fastness properties.
- Eco-friendly product free from APEO, Phthalates, PVC, Chloro organic solvents.
- Pidicron White MPTE gives very soft khadi prints with good get up of prints.

PREPARATION OF PRINTING PASTE

Pidicron White MPTE	98 parts
Pidifinish FX 500	2 parts

	100 parts

Print 2 strokes – Dry & print 2 strokes - Cure at 150° C for 5 minutes.

NOTE

1. The above recipe indicates the use of Pidicron White MPTE which may be modified according to the practical conditions of printing.
2. Pidicron White MPTE may be diluted with stock paste containing binder for getting the reduced khadi effect.
3. The viscosity of the paste can be increased to desired level by addition of small quantities of liquor ammonia.

The data presented here is based on our laboratory work and field-testing carried out and does not necessarily indicate the results the buyer or user will attain. It would however imply that the responsibility for product testing on a bulk scale for its performance lies with the buyer or user.
